Freelance - Développeur Full Stack

nov-2023

Conception et développement d'une application web complète en utilisant les langages/frameworks suivants :

- Développement d'une application e-commerce utilisant Laravel comme framework principal.
- Création d'un back-end robuste avec Laravel pour la gestion des fonctionnalités administratives.
- Utilisation de Blade, HTML, CSS et JavaScript pour le développement de l'interface utilisateur, assurant une expérience interactive et conviviale.
- Travail en étroite collaboration avec le client pour comprendre les exigences et fournir des solutions adaptées.
- Gestion autonome du projet, de la conception à la livraison, en respectant les délais et les attentes du client.

Projets

Pfe : Application d'aide à l'orientation des étudiants basée sur le deep learning

- Description : Développement d'une application comme projet de fin d'études pour aider les étudiants à choisir leur spécialité. L'application a été développée en Python en utilisant des techniques de deep learning avec TensorFlow et Keras pour les modèles CNN, MLP et RNN. L'interface utilisateur a été réalisée avec Tkinter. Le projet a impliqué la collecte de données, l'entraînement des modèles, et l'intégration dans une application conviviale pour les étudiants.

Application de gestion de factures avec Spring Boot

- Description : Développement d'une application de gestion de factures en Java avec Spring Boot. La solution intègre des fonctionnalités avancées telles que la persistance des données avec Spring Data JPA, la validation des données, la sécurité avec Spring Security. L'optimisation du code est réalisée grâce à Lombok, et les mappings d'objets sont gérés efficacement avec ModelMapper. MySQL est utilisé comme base de données pour le stockage des données.
